

Sailors around the world put their trust in Hall Spars proven performance products. In our modern production facility in the Netherlands - Hall BV in Breskens - we design, engineer and manufacture the high-performance spars delivered to our customers all over the world. Since 2017 Hall BV is part of the North Technology Group adding extra stability and the expertise of world-renowned marine and manufacturing companies in our sister companies Southern Spars, RigPro and Future Fibres, along with a global reach, with centers in Auckland, Breskens, Newport, Palma, Portsmouth, Valencia and many other corners of the world.

Hall BV Breskens has a vacancy for Design Team Lead

If you are an experienced engineer with a passion for sailing and an ambition to boost your engineering career in a competitive performance environment, learn more about this bespoke opportunity and get in touch today.

Next to performing design- and drawing work the Design Team Lead has responsibility for developing the engineering department , enhancing performance and bringing engineering to the production floor.

The candidate we are looking for has:

- Experience in composite, mechanical and structural design engineering
- Spar building and rigging experience
- Experience as team leader focussed on quality, efficiency and result
- Engineering university degree (BEng/Bsc)
